

Product: Rabbit anti-Guinea Pig IL-10 antibody

Catalog Number: 500038

Clone ID: RA0071

Antibody Clonality: Monoclonal

Host Species: Rabbit

Immunogen:

Production Method: Recombinant antibody expressed in HEK293 cells and purified with Protein A affinity chromatography.

Lot Number: As specified on each product

Size: 100 ug. Other sizes available upon request.

Concentration and Buffer: 0.5mg/ml in PBS, pH 7.4 unless otherwise stated.

Preservative: None unless specified.

Storage: 4°C. For long term storage (over two months), freeze in aliquots at -20 °C and avoid multiple freeze-thaw cycles.

Country of Origin: USA

Note: For *in vitro* research use only. Not for diagnostic or therapeutic use.

Description:

IL-10 is originally named as Cytokine Synthesis Inhibitory Factor (CSIF) [1]. It is a pleiotropic cytokine primarily produced by monocytic cells and, to a lesser extent, by various lymphocytes [2]. It has immunoregulatory and anti-inflammatory functions, including stimulation of antibody production by B cells and inhibition of pro-inflammatory cytokine synthesis by activated monocytes/macrophages [1].

Recommended Usage:

For ELISA and Western Blot, 0.1ug/ml to 0.5ug/ml of rabbit monoclonal antibody is a good starting point. Optimal concentration of antibodies should be tested under individual experiment conditions.
